

THE IMPACT OF MEDICAL COURIERS

ON NURSES & PATIENTS

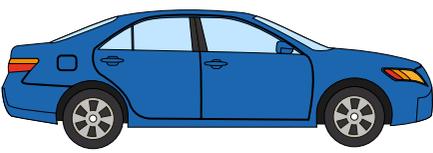

A survey of 300+ nurses from *American Nurse Journal* reveals medical courier errors have a significant impact on patient care and clinical effectiveness.

4 out of 5 nurses said that the courier impacts their work during a typical week

“The courier didn’t show up and all the lab specimens were no longer able to be used. This impacted 47 patients.”

27% of nurses transported items themselves due to courier delays in the last year

80% of nurses

from urgent care centers said courier errors impact patient care each month

“COURIERS ARE AN IMPORTANT PART OF THE PATIENT CARE CHAIN.”

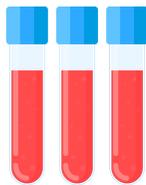

52% of nurses

have rescheduled procedures because of courier errors in the last year

“Our cancer patients have missed medication and treatments multiple times.”

66% of nurses

who work in a clinic have had to collect another specimen due to a courier error or delay in the last year

29% of nurses created a “secret stash” of supplies

HIGH-QUALITY LOGISTICS REDUCE ERRORS & COSTS

Since 2000, MedSpeed has helped health systems nationwide optimize their supply chains with reliable last-mile logistics that reduce costs and improve patient care—with an error rate 20 times better than traditional medical couriers.
