

Insourcing the Last Mile?

Here's What It Really Costs

In healthcare, the last mile of the supply chain is often the most critical and the most overlooked. From delivering temperature-sensitive lab specimens to transporting essential supplies, last-mile logistics plays a vital role in ensuring timely and safe care.

The resources required to manage last-mile logistics internally can be significant and often invisible.

The iceberg effect of insourced last-mile logistics

- Compensation and benefits
 - Vehicle purchases/leases
 - Insurance premiums
 - Fuel and maintenance
 - Supplies and durable equipment
-
- Routing technology
 - On-demand ordering technology
 - Errors and mitigation
 - Risk management
 - Dispatch management
 - Intra-network shipping (FedEx, UPS)
 - Indirect resources (human and physical)
 - Cost to expand

Outsource the complexity. **Reinvest in innovation.**

At the end of the day, the true cost of insourced last-mile logistics isn't just what shows up on a balance sheet; it's the innovation that gets delayed or deprioritized.

Outsourcing logistics to a trusted expert like MedSpeed allows organizations to reinvest time, capital, and leadership focus into initiatives that advance care delivery, operational efficiency, and longterm growth.
